One click:
Effective search for Standards

What is eresearchcenter?
Research. Integration. Management.

eresearch**c**enter is a modern platform for standards research and standards management for corporates of all sizes, research institutes and universities. The web-based intranet solution allows quick, intuitive access to bibliographic data from Perinorm, meta-data and full texts of national and international standards, regulations and other technical regulations.

- The full-text collections of BEST collection (Norm-CD) are integrated and updated monthly: DIN (in German and English), VDI (Verein Deutscher Inge-nieure), DVS (Deutscher Verband fuer Schweissen und verwandte Verfahren e.V.), LN (LN-Normen Luftfahrt), VG (Verteidigungsgeraete-Normen), WL (Werkstoffleistungsblaetter), ISO, BSI, Swiss engineering standards, technical law text collec-tions, and GEFMA (German Facility Management Association). The regulations of VDE (German Association for Electrical, Electronic & Information Technologies) can also be integrated.

- eresearchcenter works with other Standards portals: our interface gives you access to full texts from licensed Standards portals such as ASTM, SAE, IEEE and ITU.

Just click the full-text icon and everything else happens in the background. You can also integrate standards lists from other sources quickly and easily.

What does eresearchcenter offer?
Fixed performance at a fixed price.

- browser access: no client installation necessary
- access to 1.8 million records, updated monthly
- highly scalable rights management and client permissions
- compilation and management of any external or internal documents, corporate standards, manuals and other technical regulations – with access via an administrator
- instant, integrated purchase and download of additional Standards
- full-text access to other licensed Standards content from portals such as ASTM, SAE and IEEE
- usage statistics
- self-registration by users
- monitoring of documents and search queries including Document Alert

eresearch center

SAM
STANDARDS AND MORE...

- CI - corporate design integration
- full-text indexing and full-text search
- multilingual
- individual user area for managing personal documents
- fixed annual license fee without restrictions on numbers of users or locations

- access permissions can be controlled via user groups
- the layout and user interface – including language – can be set individually for each location, according to corporate identity and other requirements
- monthly usage statistics allow you to monitor the usage

How can you use eresearchcenter?
Simple version, with extended functionality or in multiple languages.

Use the simple search function to enter document numbers and keywords in multiple languages. The result is based on existing expert tags and descriptors or full-text indexing. The advanced search allows search combinations in different search fields, including document number, title and text, language, document type, status and ICS classification.

How does Standards management and user management work?
Individually, just as you need it.

- the administrator can set up various user groups and locations with different rights
- individual documents can be integrated including metadata and full-text search
- doc alerts notify of changes as they are published

What are the benefits?
Instant usage – no training required.

Whether you're accessing the Best collection or another Standards portal through eresearchcenter, the user interface is self-explanatory and no training is necessary. You're ready to go with your web browser – no installations needed.

We offer a demo version to test eresearchcenter for yourself. The hosting version is available for a fixed annual fee, regardless of user or location numbers. Naturally, the annual fee includes operation and upgrades.
